

CE MARKING STATEMENT

Topic:	CE Marking	Location:	Ashford, Kent
Date:	26/06/2013	Originator:	Technical Department

TO ALL OUR CUSTOMERS

Please note: From the 1st July 2013, in accordance with the Construction Products Regulation (CPR), manufacturers are required to affix CE Marking on a Construction product covered by a harmonised European Standard (hEN) or a European Technical Assessment (ETA) where a respective approval has been issued for it.

In addition to the above requirement, where a product is not covered by a hEN and has no ETA issued to it, manufacturers are not allowed to use CE Marking.

It should also be noted that products that are manufactured/made available to the market prior to 1st July 2013 will not have to comply with the new regulations and can continue to be sold from 1st July 2013 on the basis of the present Construction Products Directive (CPD). i.e. previous approvals are usable until the end of their period of validity (up to 30th June 2018).

The above will, of course, result in products being available for sale which were manufactured/made available to the market both before and after the 1st July 2013. Therefore, for a period of time, a product now requiring CE Marking may or may not be marked, (depending on when it was manufactured/made available), yet will still comply with the CPR.

All relevant VJ Technology own brand products will carry CE Marking in accordance with the above CPR. We are also ensuring our suppliers are fully aware and complying with the regulation where applicable.

In case of any further question please feel free to contact the VJT Technical Department on **01233 652520** or email us at technical@vjtechnology.com and we will be more than happy to assist you
