

CFA Approved Tester

V J Technology

is proud to be and Associate Member
of the Construction Fixings Association

During the year

2022

We support the CFA objective of
“Ensuring Best Fixings Practice” by:

- Providing a high quality on-site anchor testing service in the following categories:

General Purpose Anchor Testing
Scaffold Ties
Post-installed Rebar

- Testing fixings to the CFA Guidance Note “Procedure for site testing Construction Fixings”
- Maintaining test equipment that is regularly calibrated
- Recording results to the CFA format
- Employing “Competent Testers”

As an Approved Tester we have met the strict criteria of the Construction Fixings Association.

For full details on our testing capabilities, the Guidance Note “Procedure for site testing Construction Fixings” and a wealth of other support material on Construction Fixings visit the CFA website.
