# NLG Tether Choke, Twin Arm

Product code: 101369

PRODUCT BRIEF / 101369

The Twin Arms of the Tether Choke make it the safest tether point for heavy straight-shafted tools.

Sometimes things just get better – and that’s exactly the case with the NLG Tether Choke™ with two securing arms. Suitable for any tool up to 18kg in weight, the Tether Choke™ can be used on tools with captive handles and even straight sided tools such as sledge hammers, slogging wrenches etc.

Once the two securing arms are locked with NLG’s approved Tether Tape™, the most difficult to tether tools can be secured and the workplace becomes a safer place.

---

## INSTRUCTIONS

- 1/ Pass the loop end around the tool.
- 2/ Pass the V Ring through the loop end to securely cinch around the tool.
- 3/ Cut 2 lengths of Tether Tape long enough to wrap around the tool at least 5 times. Remove the plastic backing.
- 4/ Wrap the Tether Tape around the securing arms, leaving the webbing catch exposed. Ensure that the Tether Tape is firmly stretched during application, as this activates the self-fusing technology.
- 5/ Test the tether point before putting the tool into use.

---

## INSPECTION

In addition to routine checks prior to each use, all equipment should undergo regular detailed inspection, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for thorough inspection.

---

## Specification

- Twin securing arm guards against movement across both straight-shafted tools and tools with long cylindrical handles
- Optimised V Ring design for extreme performance
- Extra high strength webbing delivers ultimate peace of mind
- Faster visual inspections with heavy-duty contrast stitching
- Clever contrast wear indicators ensure early warning of any structural damage
- Ergonomic and comfortable grip optimised for use on handles
- Works with Tether Tape™
- Unique serial number for easy identification and tracking
- CE marked
- ANSI/ISEA 121-2018 compliant
- Dynamic load tested and third-party certified (2:1 safety factor)
- Dimensions: 340mm x 25mm (twin arm 150mm)
- Max Load: 18KG (39.6lbs)

## 02 / Product

CODE: 101369  
 DESCRIPTION: Tether Choke, Twin Arm  
 LOAD RATING: 18 KG / 39.6 LBS

## 03 / Conformity

The undersigned acting on behalf of [01] above hereby declares that:

The PPE described in [02] is in conformity with the provision and scope of our quality control and testing protocols set out in the PPE Regulation (EU) 2016/425 covering all PPE manufacturing, where such is the case, with the standard of fit for purpose design parameters. The above referred to Personal Protective Equipment [02] is identical to the equipment independently tested and certified by BSTL in accordance with EN 364:1992 test methods.

Dynamic drop performance testing conducted at 2:1 weight safety factor for tool lanyards and tether points. Static strength testing conducted at 5:1 weight safety factor for containers and storage equipment.
