

## 0200 - Stick Pin

Suitable for fixing insulation to steel or other smooth surfaces which should be clean and dry, free of dust, grease, oil or any other loose matter.

### Stick Pin

VJT Code	Size (mm)	Description	Pack Qty
02000010	62	With Retaining Disc	500
02000020	110	With Retaining Disc	500
02000030	160	With Retaining Disc	500
02000040	200	With Retaining Disc	500

## 0210 - Drop In Anchor

### Description

The Drop In Anchor is a female flush fitting anchor which provides a permanent threaded socket in concrete. It is ideal for applications where shallow embedment is required and is available in zinc plated steel and stainless steel grade A4.

The Drop In anchor is designed for use in concrete only and expansion is achieved by driving down the steel wedge in the anchor using a setting tool.

### Advantages

- Flush Fixing
- Shallow hole depth
- Economic and quick installation
- Controlled installation with setting tool
- Fixture can be removed at any time
- Provides a permanent threaded socket for bolts or threaded rod

### Typical applications

- Cable tray
- Pipework
- Ductwork
- Suspended ceilings
- Scaffold ring bolts
- Heavy machinery

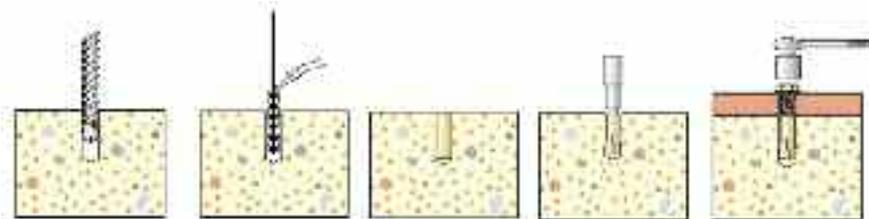

### Drop In Anchor Zinc Plated

VJT Code	Description	Internal Thread Ø	Thread Length (mm)	Overall Length (mm)	Drill Ø (mm)	Drilling Depth (mm)	Box Qty
02100010	Drop In Anchor BZP M6	M6	11	25	8	27	100
02100020	Drop In Anchor BZP M8	M8	13	30	10	32	100
02100030	Drop In Anchor BZP M10	M10	16	40	12	42	50

### Drop In Anchor Stainless Steel A4

VJT Code	Description	Internal Thread Ø	Thread Length (mm)	Overall Length (mm)	Drill Ø (mm)	Drilling Depth (mm)	Box Qty
02200010	Drop In Anchor A4SS M6	M6	11	25	8	27	100
02200020	Drop In Anchor A4SS M8	M8	13	30	10	32	100
02200030	Drop In Anchor A4SS M10	M10	16	40	12	42	50
02200040	Drop In Anchor A4SS M12	M12	18	50	15	52	50
02200050	Drop In Anchor A4SS M16	M16	22	65	20	67	25
02200060	Drop In Anchor A4SS M120	M20	30	80	25	82	25

### Installation Procedure

1. Drill correct size hole to recommended depth
2. Clean hole by brushing & blowing
3. Insert anchor into hole until it is flush with the surface
4. Use the correct setting tool and a hammer to drive the cone into the anchor until the shoulder on the setting tool touches the anchor
5. Position the fixture and bolt and tighten to the recommended torque
