

## NLG Coiled Tool Lanyard - Technical Data

### Overview:

The Coiled Tool Lanyard is versatile and hard wearing. Its compact size means that it is perfect for restricted work spaces. It is designed to lay flat to reduce the possibility of snagging. It can be used from a belt, harness or wristband and is ideal for rescue workers, scaffolders, construction workers as well as Oil + Gas, Nuclear and Utilities industries. The coil lanyard can be used with a wide range of tools under 3KG, such as hammers, spanners, ratchets, screwdrivers, pliers and power tools.

Double action, lightweight aluminium carabiners that rotate through 360° can be found at both ends. These anti tangle carabiners make the coiled lanyard ideal to use with rotating tools and extends easily without inhibiting the use or function of tools, such as screwdrivers, spanners, scaffold wrenches etc. With an aircraft grade steel core and toughened PU coating, this is one of the best coiled tool lanyards in the market. It is easy to clean and maintain.

### Key Features:

- Coil is coated with puncture and abrasion resistant PU for durability
- 360° swivel carabiners ensures that the lanyard does not tangle
- Double action carabiners with locking screwgates
- Aircraft Grade steel core for maximum strength
- Dimensions: 10cm (relaxed) - 150cm (extended) x 30mm
- Load Rated, and 3rd Party certified with a 2:1 safety factor
- Unique serial numbering for identification and tracking
- CE Marked
- Max Load: 3KG (6.6lbs)
