

0410 - Shield Anchor

Description

The Shield Anchor is perhaps the most versatile of all fixings and used by the majority of trades. Suitable for Brickwork, Medium to Dense Blockwork and Concrete.

It is an ideal general purpose anchor that fulfils a large number of applications. The Shield only version is particularly versatile when used with a wide variety of non standard components, including special lengths of threaded rod where required.

Advantages

- Projecting bolt version provides support to fixture during installation
- Pressed steel segments
- Flush fixing
- Available in different head styles
- Can be used in a wide range of materials
- Load assisted expansion

Typical applications

- Machinery installation
- Porches
- Bracketry
- Racking & storage
- Pipework
- Wall / Sole plates
