

## Ear Defenders CT3711

**General:** When worn properly and given adequate care, it provides excellent protection of hearing against high frequency noise caused by machinery, engines and equipment of different kinds.

**Requirements:** This protection conforms to the requirements with the regulation (EU)2016/425 of the European Parliament and Council relating to Personal Protective Equipment Regulation (PPE) Annex VII to European standard EN352-1: 2002 & EN352-3: 2002 Test methods.

EN352-1: 2002 & EN352-3: 2002

### Use:

1. Extend headband to maximum „open“ position and place the cups over the ears with the headband passing over the head.
2. Position the hearing protection so that the ear cups completely cover the ears and the headband on top of your head.
3. The padding on the ear cups should comfortably fit at the head.
4. The pressure can be reduced easily by bending the headband. Make sure then whether a sufficient noise reduction is available.
5. Wear the ear protection before exposing yourself to noise. Wear hearing protection during the entire time that you expose yourself in the noise.

### Attention:

1. This protection applies in the sense of EN-352-1: 2002 for the "normal" size range and fits the majority of carriers.
2. When the listed instructions in the manual are not followed, may not provide adequate protection can be ensured.

### SNR 26dB

Frequency (Hz)	63	125	250	500	1000	2000	4000	8000
Mean attenuation (dB)	13,4	10,8	15,5	25,4	34,6	32,1	41,6	37,2
Standard deviation (dB)	4,6	3,0	2,8	2,6	2,6	3,1	2,2	4,1
APV (dB)	8,8	7,8	12,7	22,8	32,0	29,0	39,4	33,1

**Cleaning:** Cleaning should be done only with soapy water. All parts that come into contact with the carriers, such as ear pads and headband must be disinfected with alcohol.

**Storage:** It is recommended to keep the hearing protection when not in use in a clean and dry plastic bags.
