

## NLG Tether Choke - Technical Data

### Overview:

The NLG Choke™ Tool Tether allows you to create an instant retro-fit tether point on power tools and heavy hand tools. Wrap the Choke™ around the tool, and pass the V Ring through the loop end to secure your tool. The Choke Tether™ will work on any larger tools with a captive handle or captive hole. It can also be used on waisted tools, such as cordless drills, mag drills, impact wrenches and power saws.

The Choke™ has been designed to give an ergonomic grip without affecting user productivity and tool performance. The versatility and simplicity of the Choke™ Tool Tether means that it can be easily reused on another tool. The Choke™ is ideal for any environment where heavy tools (up to 18KG in weight) are used, including Construction, Oil + Gas, Utilities, Renewables and more. Makes a perfect pairing with the NLG Heavy Duty Bungee Tool Lanyard.

### Key Features:
