NLG Tape Measure Tether

PRODUCT BRIEF / 101414

Product code: 101414

The Tape Measure Tether is specifically engineered to stop falling tape measures and boasts of full adjustability.

Tape measures are one of the most commonly dropped items, especially within the construction industry. The NLG Tape Measure Tether is the ideal holder for tape measures between 5m and 8m and the safest way to secure and use them when working at height.

Specially designed with its ergonomic use in mind, the NLG Tape Measure Tether allows the normal use of the measure with a high level of comfort. The sturdy clip allows the measure to be attached to belts in a conventional manner. A toughened ring on the rear of the holder allows the easy attachment to a suitable tool lanyard.

INSPECTION

In addition to routine checks prior to each use, all equipment should undergo regular detailed inspection, conducted and recorded by a competent person using the NLG Inspection Checklist. If any part is worn or shows signs of degradation, immediately retire from service. In the event of a drop, quarantine the equipment for thorough inspection.

Specification

- Easy hook and loop adjustability accommodates many tape measure sizes
- Sturdy, compact metal belt clip
- Strong welded D Ring for quick attachment
- Unique serial number for easy identification and tracking
- CE marked
- ANSI/ISEA 121-2018 compliant
- Dynamic load tested and third-party certified (2:1 safety factor)
- Dimensions: 100mm H x 100mm W x 70mm D
- Max Load: 1KG [2.2lbs]

MAX LOAD (SWL)

1KG / 2.2LBS

SERIAL NUMBERED

Makes the management of inspection routines and reports easy and traceable

CODE: 101414
 DESCRIPTION: Tape Measure Tether
 LOAD RATING: 1 KG / 2.2 LBS

03 / Conformity

The undersigned acting on behalf of [01] above hereby declares that:

The PPE described in [02] is in conformity with the provision and scope of our quality control and testing protocols set out in the PPE Regulation (EU) 2016/425 covering all PPE manufacturing, where such is the case, with the standard of fit for purpose design parameters. The above referred to Personal Protective Equipment [02] is identical to the equipment independently tested and certified by BSTL in accordance with EN 364:1992 test methods.

Dynamic drop performance testing conducted at 2:1 weight safety factor for tool lanyards and tether points. Static strength testing conducted at 5:1 weight safety factor for containers and storage equipment.
