

## NLG Tether Choke Single Arm - Technical Data

### Overview:

The NLG Choke™ Tool Tether allows you to create an instant retro-fit tether point on power tools and heavy hand tools. Wrap the Choke™ around the tool, and pass the V Ring through the loop end to secure your tool. The Tool Choke™ will work on any larger tool with a captive handle or captive eye. The single arm on the Choke™ allows it to be used on straight shafted tools, power tools, sledge hammers, clamps etc. Just cinch or choke the tool, then secure the tether in place using two wraps of Tether Tape™ around the arm. This will prevent the choke sliding along the handle or onto a trigger, the tape in this situation has no load bearing capacity, in the event of a drop all the force is taken through the choke rather than the tape. The versatility and simplicity of the Choke™ Tool Tether means that it can be easily reused again and again. The Choke™ is ideal for any environment where heavy tools (up to 18KG in weight) are used, including Construction, Oil + Gas, Utilities, Renewables and more.

### Key Features:

- Single securing arm guards against movement across both straight-shafted tools and power tools
- Optimised V Ring design for extreme performance
- Extra high strength webbing delivers ultimate peace of mind
- Faster visual inspections with heavy-duty contrast stitching
- Clever contrast wear indicators ensure early warning of any structural damage
- Ergonomic and comfortable grip optimised for use on handles
- Works with Tether Tape™
- Unique serial number for easy identification and tracking
- CE marked
- Dynamic load tested and third party certified (2:1 safety factor)
- Dimensions: 365mm x 25mm (single arm 60mm)
- Max Load: 18KG (39.6lbs)
