### Price adjustment from 2026 July 1st

Dear Business Partner,

The geopolitical situation in the Middle East and the resulting military conflicts are having a significant impact on international procurement, transportation, and energy markets. In the short term, this situation is leading to substantial cost increases along the entire supply chain. In addition, strict export quotas for certain raw materials are being imposed due to declining production rates.

Our industry is particularly affected by price developments in the metal powder and logistics sectors.

Specifically, prices for cobalt and tungsten carbide have more than doubled since January 2026 compared to the 2025 average, while prices for copper and bronze have increased by more than 25% over the same period. Furthermore, transportation costs have risen by more than 30% compared to January 2026.

Despite all our efforts to limit these price increases, we are unfortunately unable to fully offset their impact on our production costs.

For this reason, we are forced to implement a 5% price increase on all our diamond tools for orders placed from July 1, 2026.

The gross prices of SAMEDIA branded products will be adjusted accordingly to ensure a profit margin for our distribution partners.

We sincerely hope that the situation does not escalate further and that the markets calm down again. We are doing our utmost to ensure continued successful cooperation and thank you again for your long-term loyalty and trust in SAMEDIA products.

Best regards
