## New Price List 2026

Dear Business Partner,

2025 was a remarkable year in many respects. Difficult market conditions in a variety of countries, changing trade policies and other political influences made things challenging. However, the global demand for quality hand tools continued to increase.

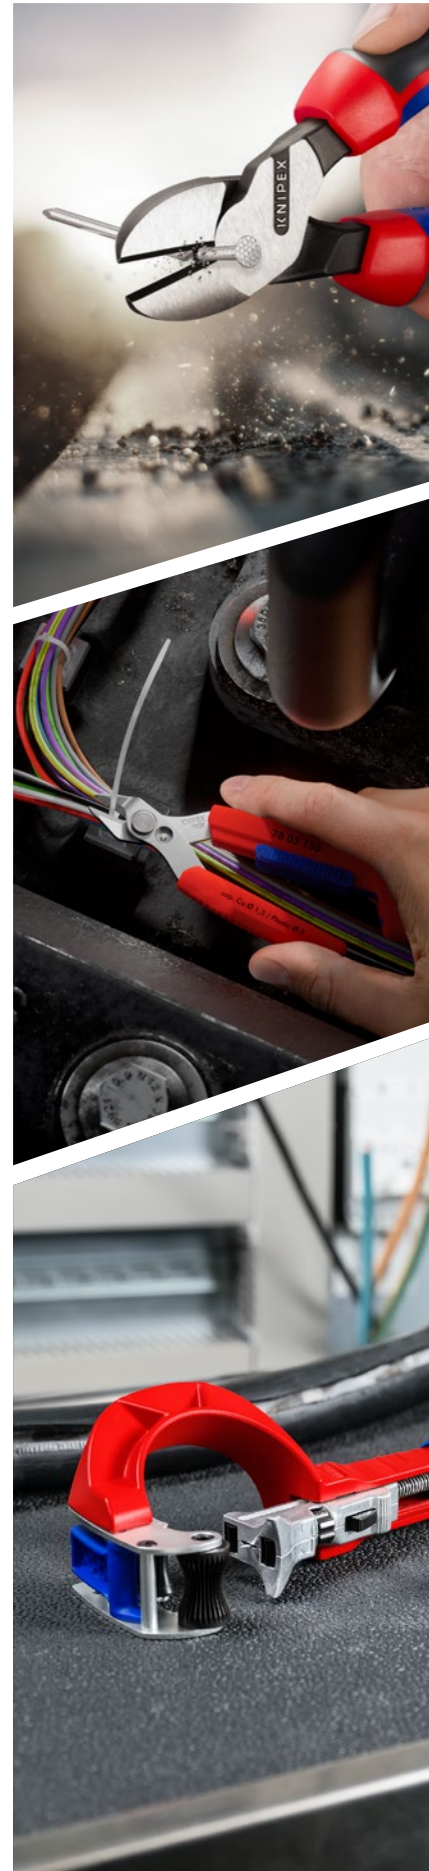

Industry and trade still require effective, precise and ergonomic tools. Also, the aspect of sustainability is becoming increasingly important. Customers now expect low-emission, long-lasting products that meet high sustainability standards, with rating agencies such as EcoVadis setting binding benchmarks.

In today's business environment, partnerships and trust have become more important than ever. We believe that close collaboration with our customers is the key to navigating uncertainty and driving improvements and innovation. Your feedback and support have helped us to adapt quickly and remain competitive in a changing market.

We are pleased to report that KNIPEX achieved positive sales and business development in 2025. Sales grew across key markets, driven by robust demand, new products and marketing support, also via social media.

Our investments in additional production capacity and faster logistics are already delivering tangible results, reinforcing our position as a strong, future-oriented partner. To secure competitiveness, we have invested significantly in development and innovation in both technology and products.

The overall cost situation necessitates a moderate price adjustment. From 1 April 2026, prices will increase by an average of 1.8% in line with the new price list. Orders placed before the end of March will be fulfilled at current prices within the usual timeframe; for deliveries requested from April onwards, the new prices apply.

Looking ahead, we are excited to announce four new products for 2026:

- 1. KNIPEX Slim Knips 78 XX 150:** From cable ties to the thinnest wire: ultra-precise cutting, flexible handling and perfect accessibility – even in tight spaces. Precision that can reach anywhere!
- 2. KNIPEX STX60 Stripping Tool:** Circular and longitudinal cutting in one tool – with quick adjustment, precise cutting depth and guide rollers for perfect results even with hard cable sheaths.
- 3. KNIPEX Diagonal Cutter 74 0X 250:** New power joint, refined handle shape and induction-hardened precision cutting edges make for noticeably reduced effort with maximum continuous load capacity.
- 4. KNIPEX Modular X15 Tool Backpack:** Robust, stable and ergonomic: waterproof molded bottom, recycled fabric and secure compartments for tools, notebook and accessories.

In addition, our new merchandising and spare parts webshop is already live in Germany, with most EU countries to follow soon.

For the first time, this letter also includes a list of the most popular Rennsteig products, which you can order directly from our warehouse (subject to sales conditions).

We sincerely thank you for your trust and support throughout the past year. With close communication and exchange we will continue to innovate, grow and foster our relationship.

Best regards and wishes,  
K N I P E X – Werk
